

# PLACCEL 205

Polycaprolactone diol

**<Description>**

PLACCEL 205 is polycaprolactone diol and its molecular weight is 530. Since it is produced from diol and epsilon-caprolactone by ring opening polymerization reaction, control of hydroxyl group value is exact. In addition, there is no variation in quality.

PLACCEL 205 can be used as modifying agent for polyurethane, paint resin, and epoxy resin. Especially, polyurethane made from PLACCEL 205 has high capacity for heat resistance, cold resistance, oil resistance, and abrasion resistance.

**<Composition / Information on ingredients>**

Chemical Name or Generic Name	Concentration or % Range	Unit, %
Polysorbate 80	0.9%	1000-10000

[illegible]

Year	2000	2001	2002	2003	2004	2005
2000	100	100	100	100	100	100

It should be noted that typical property values shown in this technical data sheet are representative values and are not guaranteed values. Please contact us to obtain detail of product and guaranteed values.

Please refer to our SDS (safety data sheet) for information on the handling of each product.
