

PLACCEL 305T

Polycaprolactone triol with improved hydrolytic stability

<Description>

PLACCEL 305T is polycaprolactone triol and its molecular weight is 550. Since it is manufactured by the ring opening polymerization reaction of the triol with epsilon-caprolactone, control of hydroxyl group value is exact and there is no variation in quality.

PLACCEL 305T is raw material of CASE (Coating, Adhesion, Sealant, Elastomer). It can be used as modifying agents or cross linking agent such as polyurethane, paint resin, and epoxy resin. In addition, it can improve hydrolytic stability than using PLACCEL 305 by its controlled low acid value.

<Composition / Information on ingredients>

Chemical Name & CAS No.	Composition & % Range	USE (%)
Polycaprolactone triol	100%	100%

Item	Value	Item	Value	Item	Value	Item	Value	Item	Value
OH	1.0	OH	1.0	OH	1.0	OH	1.0	OH	1.0

Item	Value	Item	Value	Item	Value	Item	Value	Item	Value
OH	1.0	OH	1.0	OH	1.0	OH	1.0	OH	1.0

It should be noted that typical property values shown in this technical data sheet are representative values and are not guaranteed values. Please contact us to obtain actual product and guaranteed values.

Please refer to our SDS (Safety Data Sheet) for information on the handling of each product.
